

# THE FASTEST WAY TO POWER UP YOUR BUSINESS IS HERE

## *Final Connect Outsourced Solutions*

---

Final Connect simplifies information technology for business by offering consulting, connectivity, network management, help desk, co-location services, hosted applications, and custom technology solutions. By using our services, your company realizes significant savings over procuring these services independently. Our small business specialization realizes the economies of scale of group buying power making services simply cost less.

**Fulfilling the broadband promise™**

## Enhance Your Business with the Final Connect Competitive Advantage

One of the most powerful tools for enhancing your productivity and driving your growth is the Internet—if you have the right connection. With all of the choices on the market today, there is only one that truly redefines the concept of speed and scalability—super high-speed, broadband Internet connections from Final Connect.

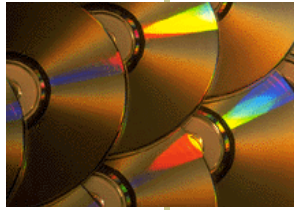

The Final Connect broadband building network is being installed in commercial office buildings in your area, delivering customizable data speeds up to 10Mbps. The broadband building network is highly scalable and capable of keeping pace with your business. This is not DSL or Cable, it is broadband. Where ever your business needs to go with the Internet, our network is there.

For more information on Final Connect services, call us at (949) 515-1876 or visit our Web site at [www.finalconnect.com](http://www.finalconnect.com).

## With an On-site or nearby account team and responsive customer service, Final Connect is Always On

Final Connect provides more than successful e-solutions. Final Connect offers superior, responsive service guaranteeing your company the support you need when you need it.

Account executives, sales engineers, project administrators and field engineers who know your name and your business are always either on-site or nearby. This dedicated staff is only the beginning. With guaranteed response times, customer care is only a phone call away—whenever you need it.

## Control Your Business with Final Connect Power Tools and the IT Support

Final Connect offers a suite of power tools specifically designed to help businesses do more—cost-effective, enhanced communications positioning your company for the future.

Final Connect offers an entire portfolio of broadband networking options, including high-speed Internet access, remote access, virtual private networks, wide-area (WAN) and local-area (LAN) integration and remote data backup and storage.

You can schedule a video conference, make free phone calls over the Internet, instantaneously retrieve email, view live videos, and order discounted office supplies and services through our office portal—[Slamdunkoffice.com](http://Slamdunkoffice.com).

To keep your business on the cutting edge of information technology, Final Connect offers professional and managed services, ranging from Web hosting and branded email to on-site consulting. Our professionals are at your service, ready to provide the support your business needs today—and in the future.

## Solutions based on industry standard technology

The same technology used to power the Internet powers the Final Connect broadband network. Final Connect technology partners include companies like Cisco®, Microsoft®, Copper Mountain Networks®, USA.NET®, DSLnetworks®, Interspeed®, AT&T® and Breezecom®. Final Connect partners are the industry leaders bringing network solutions for your business that meet the requirements of today with expandability for tomorrow.

Always-on, broadband Internet connections. A host of business connectivity services, applications and managed services. Unsurpassed customer support that's next door or around the corner and proven technology partners. That's the Final Connect difference. Connecting you to what you need today and tomorrow.
