

The "Smart Building" Solution

Final Connect provides broadband data, video and voice communications services to small- and medium-sized businesses over networks that we design, own and operate inside multi-tenant office buildings. Our networks provide tenants with high-speed Internet access, building Intranet services, voice services, and value-added services.

Our network provides a cost-effective, guaranteed, secure, and simple-to-use communications solution to answer your Information Technology needs. By using our services, your company realizes significant savings over procuring these services independently.

Our unique building approach also enables your company to utilize the next step in broadband technologies: virtual private networks (VPN), Intranets, Extra-

Offices in Costa Mesa, CA and Las Vegas, NV

Why Final Connect?

Connect Now

Final Connect guarantees our network installation dates. Once our network is installed in your building, we can have your company connected in less than three days.

Guaranteed High Speed

Final Connect offers only guaranteed speed and service for both uploads and downloads. Other providers neither guarantee your speed nor promise upload speeds that match download speeds. While some of our competitors oversubscribe your line at more than 20 to 1, Final Connect guarantees your dedicated line will give you the minimum speed you order. Furthermore, our high speed networks have a reliability rate exceeding 99.5%. Our broadband network simply gives you superior service for less.

Value Added Services

Final Connect provides more than just a connection, we provide value added services to help your company maximize the benefits of broadband. Final Connect immediately adds value to your business by providing readily available broadband services and consulting. Give your employees the ability to work from home with our unique secure virtual private

networks (VPN). Build an Intranet linking all of your employees or an Extranet linking all of your key suppliers and stakeholders. Our broadband services grow with your business, allowing your business to be more competitive in this increasing challenging market place.

Secure

With a Final Connect connection, rest at ease that your dedicated line is secure and private. Final Connect understands the importance of keeping your company's data private. That is why Final Connect's network incorporates redundant firewall and authentication features keeping data secure and private. Final Connect empowers your business through secure, industry-standard technologies.

Remote Desk Top Support

Final Connect maximizes your broadband investment with specialized remote management services. This new consulting feature allows Final Connect to solve many desktop computing issues remotely. This consulting service will save your business at least 40% over the cost of traditional desktop support services. Furthermore this program allows Final Connect to configure and assist in desk top demands immediately, no longer do businesses need to wait until the next business day for assistance.

Local Customer Care

By partnering with Final Connect, your business

receives support from our account executives, sales engineers and field engineers who listen to your concerns and respond immediately to your needs. Our dedicated staff is either on-site, nearby or remotely available to guarantee response times and superior customer care.

Next Generation Solutions

Final Connect's open approach to meeting the challenges of businesses allows us to develop and implement unique solutions that can be utilized by all our client-partners. The latest broadband technologies and services such as VPNs, ASP Solutions, e-commerce, m-commerce, and Voice Over IP solutions are configured to meet your individual needs.

Final Connect positions your
company for the future.
